

Position: Engineer Architect

Description: Engineer Architect should coordinate efforts with other engineers and architects to prevent difficulties in building, focusing primarily on structural integrity, safety and efficiency.

Responsibilities:

- Consult with other engineers and architects.
- Evaluate blue prints and plans for potential construction problems.
- Ensure that building plans are according to code.
- Determine the structural integrity of a building.
- Recommend specific upgrades and changes to increase efficiency.
- Make changes to specific systems, such as lighting or heating, to improve safety.
- Assess cost-effectiveness of various options.

Required skills/qualifications:

- Degree in construction/building management, building engineering/studies, construction engineering management or civil/structural engineering
- Good communication skills
- Problem solving skills
- Commercial awareness
- Teamworking skills
- Proficiency in using computer-aided design (CAD) software.

Interested candidates are asked to send their CVs to hr@hvac.am e-mail, mentioning in the message title: **Engineer Architect**
